

AGRI GUM[®]

General Description	AGRI GUM is a superior lubricating agent for increasing pellet production rate, reducing energy usage, and improving pellet durability. AGRI GUM at 2 lb per ton will provide the same lubrication as 18 to 20 lb of fat or oil without decreasing pellet quality.
Functional Use	The heat and moisture in the conditioning chamber liquefies and activates AGRI GUM thereby improving steam penetration into feed, coating the surface of the feed and reducing friction at the die.
Chemical Composition	Natural vegetable gum, sodium salts of food grade fatty acids, diatomaceous earth and artificial flavoring.
Feed Tag Label	Recommendations: We are citing the FDA regulation 501.100 (3)(ii)(c), 21 CFR which exempts animal food processing aids from compliance with the required declaration on an animal feed label of ingredients. AGRI GUM meets the established standard as "substances that are added to a food for their technical or functional effect in the processing but are present in the finished food at insignificant levels and do not have any technical or functional effect in that food."
Carrier	None
Color	Tan
Odor	Pleasant
Use Level	1/2 to 2 lb per ton of ration to be pelletized.
Packaging	50-pound multi-wall, poly-lined paper bags.
Storage	Product stores well and remains stable under normal conditions. Bag should be kept closed and stored in a cool, dry place.
Bulk Density	30-lb/cu. ft.
